Sudhanand Business Solutions

Our Journey So Far

Replace:

- **2024 → 2026**

Update the journey statement to:

From 4 members in 2020 to 100+ today, with 200 expected by 2025.

From 4 members in 2020 to 150+ today, with 250 expected by 2028.

About Us

Replace the existing journey/year reference with the updated 2026 reference.

Software Testing Team

Leadership

Nagashree Nagaraj

5+ years of QA-driven development in Agile/DevOps environments. Advanced proficiency in Java & Python for scalable automation solutions. Expert in designing and implementing end-to-end test suites using Selenium WebDriver, TestNG, PyTest, and BDD frameworks (Cucumber/Behave). Skilled in REST/SOAP testing using Postman, REST Assured, and integration validations with Swagger/OpenAPI specs. In-depth knowledge of SAP HANA data models, SQLScript, and performance optimization in enterprise environments. Seamless test integration with Jenkins, GitLab CI, and Dockerized test environments.

- Replace Nagashree's current image/profile with **Rajesh Kumbara's** information.
- Update the Team Lead (TL) content and designation to reflect the present/current information. RAJESH IS TL.

Rajesh is a technology professional with 12+ years of experience, including Software Testing and QA. He leads a team of 13 testing professionals and specializes in Manual Testing and Automation using Python, Selenium, and Playwright. With strong expertise in automation frameworks, functional and regression testing, and QA process improvement, he combines technical skills with effective team leadership to ensure quality software delivery.

Panduranga B P, **Associate Manager**

- **Staff Accounting:** Prakash
- **Book Rolls:** Rakesh
- **Data Science:** Divya Anand

- UPDATE PANDU' AND DIVYA ANAND's INFORMATION AS LEADERSHIP FOR BOTH DATA ANALYTICS AND DATE ENGINEERING

CAT Modeling

Delivering advanced catastrophe risk solutions through simulation-based modeling, strategic risk planning, and proactive disaster readiness.

- Led by Bharti Kaushik, CAT modeling specialist with 3+ years of experience
- Expert in high-impact peril modeling including hurricanes, floods, and large-scale natural disasters
- Skilled in portfolio analysis, reinsurance strategy, and scenario-based stress testing

-

CAT Modeling

- Replace Bharti's current image with the updated team member information.

- Update the Team Lead (TL) content and designation accordingly.

Add Actuarial Science & Analysis

Add Cobol Development Page - Madhu

COBOL & Legacy Systems

Delivering reliable enterprise solutions through COBOL development, AS400/IBM iSeries expertise, and legacy application management.

- Led by Madhu, with expertise in COBOL- based legacy application systems
- Specialized in AS400/IBM iSeries platforms and business-critical legacy software
- Experienced in application maintenance, enhancements, troubleshooting, and system support

COBOL Development

Delivering dependable enterprise solutions through COBOL development, AS400/IBM iSeries expertise, and efficient legacy application management.

Core Services

COBOL Application Development – Developing and enhancing robust COBOL applications for enterprise and AS400/IBM iSeries environments

Legacy System Maintenance – Maintaining, troubleshooting, and supporting critical legacy applications to ensure reliable business operations

Application Modernization – Enhancing existing legacy applications while preserving core business functionality and continuity

System Integration – Connecting legacy COBOL applications with databases and modern enterprise systems

Performance Optimization – Improving application performance, stability, reliability, and resource efficiency

Key Strengths

COBOL & IBM i Expertise – Applying strong technical knowledge across COBOL, AS400, and IBM iSeries environments

Reliable Solutions – Delivering stable and dependable solutions for business-critical applications

Legacy Modernization – Improving existing systems while maintaining essential business processes

Problem Solving – Diagnosing and resolving complex application and system issues

Business Continuity – Ensuring critical legacy applications remain reliable, maintainable, and operational

**Abhi: Do we add details of PPA, Claims leads too?- Ram HH

Remove Captain Sir, from the website
Change entity title from sudhanand group to Sudhanand business solutions - from teams section
Add arun sir picture and small details abt him and also in the teams section
Remove captain sir video from the website and replace it with AI video od SBS

Time line update :

1. Staff accounting - Nov 2024
2. Data analytics - jan 2023
   Data engineering - April 2023

3. COBOL - dec 2025
4. Actuarical Sciences - feb 2026

Change vijay asranis sir designation to CAO

Claims - content to be rephrased (Chanadan Ma’am) team lead with 2 + plus years and

Ms. Chandana

Ms. Chandana brings over 5 years of entrepreneurial experience in the hospitality industry. She later transitioned into the insurance sector as a Claims Process Associate at Cabrillo Coastal General Insurance, where she has gained 3 years of experience. With over 2 years of experience in a team leadership role, she brings strong expertise in claims processing, team management and operational coordination.

Senior Quality Analyst

Sangeetha oversees claims quality during the day shift, ensuring accuracy, compliance with established standards, and consistent process excellence across claims operations.

Claims Assessment Associate

Vishnupriya supports efficient claims operations by ensuring timely assignment processing, smooth workflow coordination, and consistent client support for the US Harbor Claims team during US business hours.

Actuarial Sciences

At Sudhanand Business Solutions, our Actuarial Sciences team focuses on risk assessment, data analysis, and predictive modelling to support informed decision-making in the insurance sector. By leveraging mathematical and statistical techniques, we help analyse claims trends, evaluate financial risks, and improve operational efficiency, enabling better risk management and data-driven business outcomes.

Core Services

Risk Assessment & Analysis – Evaluating financial and insurance risks using statistical methods, mathematical models, and data analysis.

Claims Analytics – Analysing claims data, identifying trends, and generating insights to support effective claims management.

Predictive Modelling – Applying statistical techniques to forecast future risks, claim patterns, and potential financial outcomes.

Loss Forecasting & Estimation – Estimating potential losses and evaluating risk exposure to support financial planning and risk mitigation.

Data Analysis & Reporting – Transforming complex datasets into meaningful insights to support strategic planning and operational efficiency.

Key Strengths

Statistical & Mathematical Expertise – Applying quantitative methods to assess risk and interpret complex insurance data.

Data-Driven Decision-Making – Delivering analytical insights that support informed business and financial decisions.

Risk Modelling & Forecasting – Identifying emerging risk patterns and estimating potential future outcomes.

Claims Performance Analysis – Evaluating claims trends, loss patterns, and operational performance to identify improvement opportunities.

Analytical Problem-Solving – Using structured analytical approaches to address complex risk and insurance challenges.

Operational Efficiency – Supporting improved processes through accurate analysis, reliable reporting, and actionable insights.
